

Assumption:

- people(recordID) necessary because there no combination of other data is guaranteed to be unique.
- appointment(appointmentID), visitRoutineResults(visitID) created to simplify tables, as well as foreign keys in related tables
- finalDiagnoses has a default content of 'pending' (provides details for future entry viewing, can be updated at any time)
- assumes a given test will only be done once on a given date. Type can be changed to datetime instead of date if more copies of the same test are done on the same day.
